Azure Assist – One stop solution for Azure.

Description

Azure Assist is on a mission to empower every one to communicate in their native language to get help on Azure. We believe that language should never be a barrier to knowledge or connection, especially in the digital age.

Azure Assist is committed to enabling communication in native languages for all individuals. In today's digital age, language barriers should not hinder access to knowledge or connection. Azure Assist facilitates effortless communication with ChatGPT in a variety of local dialects, promoting linguistic diversity and inclusion. By bridging the language gap,

Azure Assist is opening doors to opportunities and promoting a more connected society. With Azure Assist, no one will be left behind in the AI era simply due to their language proficiency to get help on Azure.

Kudos to project LLM Bhasha which helped to think about this project Azure Assist.
